

## CURRICULUM VITAE ADRIANA ALBINI

Adriana Albini was born in Venice (I) and works in Milan. Married, with two children.

She is the Director of Laboratory of the Vascular Biology and Angiogenesis Laboratory of IRCCS MultiMedica, Sesto San Giovanni-Milano and Scientific Director of Fondazione MultiMedica Onlus, Milan.

From April 2012 to August 2015 she was the Director of the Department “Research and Statistics Infrastructure” (I-RS) and Director of the Translational Research Laboratory at the IRCCS “Tecnologie Avanzate e Modelli Assistenziali in Oncologia” - Arcispedale S. Maria Nuova - Reggio Emilia

She has been President of the Italian Society for Cancer Research (SIC) and President of Metastasis Research Society (MRS).

She has a Ph.D in Chemistry and trained from 1985 to 1987 as a postdoctoral fellow at Max-Planck Institute for Biochemistry, Martinsried bei Muenchen , Germany.

From 1985 to 1987 worked as “Visiting Scientist” at National Institutes of Health, NIH, Bethesda MD (USA).

From 1986 to 1996 she was deputy chief in the Department of Chemical Carcinogenesis (National Institute for Cancer Research) where in 1996 she became chief of the section “Mechanisms of Tumor progression”. From 1999 to september 2006 Dr. A. Albini was the head of Laboratory of Molecular Oncology.

From June 2004 to September 2006 she was Deputy Chief of Intramural Research, National Institute for Research on Cancer, Genoa (IST).

From January 2005 to September 2006 she was Director of the Department of Traslational Oncology.

From 2006 at 2012 she was the Head of Oncology Research at Fondazione MultiMedica Onlus, Milan

From 2009 at 2012 she was Scientific Director of MultiMedica Medical Center Castellanza (VA), Italy.

She is member of editorial boards of scientific journals: Carcinogenesis, Cancer Research, Journal of the National Cancer Institute.

She is Member of Scientific Council AIRC\_Italian Association for Cancer Research, Member of Panel L4 ERC Consolidator Grants and Evaluator for MIUR-Ministry of University and Instruction of Italy.

She is member of the Scientific Council of ONDA (National Observatory on Women's Health)

She is member of the Scientific Council of ESO (European School of Oncology).

Dr. Albini received various scientific awards.

She has over 300 scientific publications in peer review journals. She is among the most cited Italian women scientists with highest h Index (a measure of citations), of 78 (Scholar).

Her major focus is tumor microenvironment,t in vitro and in vivo models for angiogenesis and inflammation, mechanisms of invasion of tumor and endothelial cells. Her most recent interest is anti-angiogenesis in a chemopreventive setting. She developed major assays in invasion and angiogenesis and has numerous patents in the field.

She is active as scientific journalist and novel writer.

She is fencing in the Veteran Ligue of Italy with several medals and the European Silver in épée in 2015.
