Education and regulatory issues

Prof Pruneri: Hello, everyone. So, welcome to the fourth and the last session of the ESO and the ESP Congress in Digital Pathology. This will be a session that will be focused on the educational and the regulatory issues. I will welcome my co-chair Jeroen van der Laak, sorry for the pronunciation. He's a computational biologist of the Department of Pathology at Radboud University Medical Center in Nijmegen. We will have three talks in this section. The first will be a talk provide by myself, that is ESO project with Kyrgyzstan. The second one will be a live update, a multidisciplinary approach for the digital pathology diagnosis of complex cases that will be chaired by Dr Bonoldi. She's based in Italy at the Hospital Niguarda in Milan. And finally, there will be a talk, a recorded talk on digital workflow and artificial intelligence implementation focused on the regulation, and this will be provided by Marcial Garcia Rojo from the Hospital Universitario Puerta del Mar in Cadiz, Spain. So, I think that it is a very interest program so, please, we can start with the first presentation that is ESO project with Kyrgyzstan. Thank you.
